OCEANA SERVICES, LLC

OIL TESTING & INSPECTIONS

Petroleum Testing & Inspection Solutions

Independent testing and inspection for crude oil and refined products - from the laboratory bench to the dock.

Based in Pasadena, Texas

Serving the Houston Ship Channel

ABOUT OCEANA

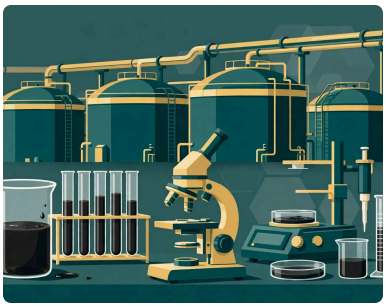
A local testing and inspection partner on the Ship Channel

Oceana Services, LLC is an independent petroleum testing and inspection company based in Pasadena, Texas, in the heart of the Houston Ship Channel - surrounded by the refineries, terminals, storage facilities and marine traffic that move crude oil and refined products every day.

Oceana brings laboratory testing and field inspection together under one call: samples are drawn and gauged where the cargo sits, and tested so buyers, sellers, refiners and terminal operators can make custody-transfer and quality decisions with confidence.

Petroleum Laboratory Testing

Laboratory analysis of crude oil and refined products, giving terminals, traders and distributors a clear picture of the product they are buying, selling or storing.



Crude Oil Testing & Assay

Crude oil testing and assay work for cargoes moving by tanker, pipeline and storage tank - the information refiners and traders need before a cargo changes hands.

Cargo & Field Inspection

Quantity and quality inspection at the terminal and on the water - tank gauging, sampling and loss control for custody transfer.

Why work with Oceana

- **Independent and third-party.** Oceana works for the client who calls - not for either side of the trade.
- **Pasadena-based.** Inspectors and testing are close to the terminals and docks of the Houston Ship Channel, not dispatched from out of state.
- **Testing and inspection together.** One provider covers the sample from the tank or vessel through to the test result.

SERVICES

Testing and inspection across the barrel

From crude oil at the dock to finished fuels at the terminal, Oceana covers the products that move through Pasadena and the Houston Ship Channel.

Petroleum Laboratory Testing

General laboratory testing of petroleum products for terminals, traders, distributors and refiners across the Ship Channel.

Crude Oil Testing & Assay

Testing and assay of crude oil cargoes in tankers, pipelines, storage tanks and refineries.

Cargo Inspection

Independent quantity and quality inspection of oil cargoes at loading and discharge, for custody transfer.

Gasoline Testing

Testing and inspection of gasoline for suppliers, terminals and distributors.

Diesel & Middle Distillate Testing

Testing of diesel, including ultra-low sulfur diesel (ULSD), and other middle distillates.

Jet Fuel & Kerosene Testing

Testing of jet fuel and kerosene for aviation fuel suppliers and terminals.

Bunker Fuel Testing & Survey

Bunker fuel testing and quantity surveys for marine fuel deliveries on the Ship Channel.

Marine, Vessel & Barge Inspection

Inspection of vessels and barges carrying petroleum cargoes, including marine cargo surveys.

Tank Gauging, Sampling & Loss Control

Shore tank gauging, petroleum sampling and loss control work at terminals and storage facilities.

LPG / LNG Testing & Inspection

Testing and inspection of liquefied petroleum gas (LPG) and liquefied natural gas (LNG) cargoes.

Petrochemical & Chemical Testing

Testing and cargo inspection for petrochemical and chemical products moving through the Pasadena area.

Products Covered

Crude oil - gasoline - diesel and ULSD - jet fuel and kerosene - bunker fuel - LPG and LNG - petrochemicals.

SERVICE AREA & CONTACT

Serving Pasadena and the Houston Ship Channel

Oceana is based in Pasadena and serves the refineries, terminals, storage facilities and docks along the Houston Ship Channel and the surrounding Bay Area communities.

Pasadena - home base | Deer Park | La Porte | Baytown | Channelview | Texas City | Houston

How to request testing or an inspection

1. **Tell us the product**
   Crude oil, gasoline, diesel, jet fuel, bunker fuel, LPG or a petrochemical cargo - and the test or inspection you need.
2. **Tell us where and when**
   The terminal, tank, vessel or barge location, and the timing of the loading, discharge or transfer.
3. **We sample, gauge and test**
   Oceana handles the field work and the laboratory testing as one job, from sample to result.
4. **You get the result**
   A clear report of quantity and quality, so the cargo can move and the trade can settle.
